NIR is currently used in a range of industries providing enormous time and cost saving benefits for each company. The Pharmaceutical industry in Australia is slowly implementing NIR as process analytical technology (PAT) and achieving similar benefits.

But why are there only a hand full of companies, at this stage, progressing and enjoying the benefits?
Is it the complexity and the unknown of Near Infrared Spectroscopy?
Is it a lack of knowledge, resources or funding?

The benefits of implementing and utilising NIR to its full capacity will be discussed in this seminar and would be of interest to Manufacturing, R&D, Regulatory, Validation and Quality Assurance
