The School of Chemistry at UNSW invites applications for a short-term visiting lectureship from an eminent academic in the discipline of chemistry to spend a period 4 to 6 weeks within the School. The successful applicant will perform two key roles during his/her time here:

- to present a research lecture to the School and to meet with UNSW researchers, with the aim of establishing links and potential collaborations.
- to present a lecture series of 12 lectures to a group of 3rd/4th year students (a component of the undergraduate course "Topics in Contemporary Chemistry"), including assessment.

The aim of the visit is to further enhance the international or national standing of the School. The visitor will be of adequate international standing such that he/she will provide the possibility of building international and or national research links and provide suitable mentoring for staff in the School as well as enhance the quality of the higher year teaching program. Face-to-face interactions between the visitor and UNSW researchers will facilitate research collaborations, potentially leading to new funding opportunities. The visit will also allow the School to extend its branding amongst influential senior academics in the discipline.

Budget allocation: $8,000

Applications are to be made by email directly to the Director of Research, A/Prof. John Stride and should include:

- a full CV of the applicant
- an outline of the U/G lecture series (12 x 50 minute lectures), indicating the field and proposed assessment tasks
- a time period in which the Lectureship would be taken up (ideally second session)
- a letter of support from a host academic within the School

Applications may be submitted at any time, but must be completed & submitted to the School by the end of the calendar year in order to be considered for a Howard Lectureship during the following 12 months. All applicants will be notified of the outcome by 14 February. The selection process will be undertaken School Executive Committee.
